- › NoSQL, MongoDB
- › Redis, Jobs/Queues
- › GraphQL

Tools/Others

- › Jest, AWS, GIT, GitHub Actions, WebSockets, Docker

EXPERIENCE

Full Stack Developer (Full Time), Acedboard — Jan 2024 - December 2024

SKILLS - Nuxt/VueJS, FeathersJS, Redis/Job Queues, MongoDB, WebSockets, TypeScript

- Designed and executed the architecture for third-party integrations, enabling users to sync events and tasks with Google Calendar and O365 Calendar.
- Architected, implemented and optimized texting module for swift and efficient user communication.
- Implemented project templates, serving as a launching point for users and increasing productivity, netting a 20% increase in user "ease of use".
- Implemented automations using jobs/queues to automatically execute tasks, netting a 15% increase in user experience.
- Integrated payments using Stripe, monetizing the product.
- Contributed innovative ideas to enhance the overall product and partook in screening interviews for potential colleagues.
- Implemented ERP integration, enabling tailored marketing and user outreach netting a 15% increase in product awareness and user comfort.

Full Stack Developer (Contract), Genti — June 2023 - August 2023

SKILLS - Laravel, Axios, TailwindCSS, GitHub, JQuery, Sass

- Spear-headed efficient data modeling, aiding retrieval of product analytical information, helping drive insightful business decisions.
- Integrated several payment gateways like Flutterwave, Stripe to enable payments and subscriptions.
- Worked with Product Manager and team members to analyze web application requirement and engineered solutions.
- Set up E2E, Unit, and Feature tests to ensure robustness and maintain a high level of functionality, security, and performance throughout development process culminating in a 12% increase in development iterability.

Full Stack Developer (Full-Time), Multilancer NG — March 2022 - January 2023

SKILLS - Laravel, Node/Express, TailwindCSS, GitHub Actions, React/ NextJS, GraphQL, PostgreSQL, TypeScript, Docker

- Engineered, developed and maintained both frontend and backend of multiple web applications using Laravel, React.
- Collaborated with UI engineers to deliver frontend of various web applications.
- Setup CI/CD using GitHub actions to aid rolling out of new features.
- Employed TypeScript to enhance code quality, maintainability and ensured a more robust development process with static typing.
- In this role I used GraphQL to filter data returned from API's that fetch data from PostgreSQL powered databases to optimize usability on several client apps on the frontend.

Full Stack Developer, Freelance — June 2020 - January 2022

- In this role I built and managed functional web applications for my clients.
- I communicated effectively and efficiently to deliver scalable web applications that were both functional and satisfied my clients.
- Leveraged server-side rendering (SSR) using NextJS, increasing SEO visibility ultimately furthering business interests.
- Utilized Redis for efficient data caching, enhancing the speed and responsiveness of clients web applications leading to increased end user satisfaction.

SOFT SKILLS

- Organized, detail driven, meticulous planner with excellent time management skills.
- Excellent communication skills in written and spoken English.
- Flexibility and adaptability in navigating through evolving project requirements and dynamic work environments.
- Passion for creating solutions, staying up to date with technology trends and up-skilling.
- Ability to make use of multiple web frameworks effectively.
- Takes initiative and demonstrates a proactive approach in identifying potential issues before they arise, contributing to smoother project workflows.
- Able to multitask and handle multiple projects at the same time.
- Dynamic and adaptable with the ability to collaborate with Product Managers/AGILE or SCRUM teams/UI engineers to deliver functional product.
